(54) Title: DRYING RACK IN DRYER

(57) Abstract: The present invention relates to a laundry dryer, and more particularly, to a drying rack in a drum of a dryer for drying objects other than clothes, such as shoes. To achieve the object of the present invention, a drying rack in a dryer includes a rack detachably mounted to an inside of a drying drum for placing a drying object thereon, and at least one drying stick for supporting the drying object spaced a predetermined distance from the rack. Accordingly, since the drying object placed on the drying stick is not shaded by the ribs of the seat from the hot air, the drying rack in a dryer of the present invention can dry the drying object, uniformly.
